EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the claims:

Claim 5, line 4, delete "on" and insert --one--.

Claim 9, line 4, delete "on" and insert --one--.

Explanation for Examiner's Amendment

3. Claims 5 and 9 have been amended to correct a typographical error.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance.

The method and apparatus both require the combination of first, second and third extruders for extruding a multi-layered plastic tube of which at least one layer is impermeable to water vapor and at least one layer is impermeable to oxygen; additionally, the method and apparatus require that molds are alternatively located below the extrusion head for alternatively receiving the extruded multi-layered plastic tube; finally, the method and apparatus require that the molds be alternatively located at respective blowing and filling devices located respectively to the sides of the extrusion head, where the tube is formed into a container and filled. The method then requires sealing of the container by welding, and the apparatus requires that the blowing and

filling devices are blowing-filling-sealing device at which the tube is blown into a container, filled and sealed. The subject matter of the method and apparatus is not taught or suggested by the prior art. While the prior art may suggest multi-layered plastic tubes being formed into containers, and the idea of alternating the position of molds, a person having ordinary skill in the art, would not have found the combination obvious without resorting to impermissible hindsight because the combination of features suggested by the prior art would not have been expect to produce predictable results.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Substitute Specification

5. Receipt is acknowledged of a substitute specification, filed 20 September 2007, which has been placed of record and entered in the file.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached form (PTO-892) are cited to show various methods and machines for extruding, molding, filling and sealing containers. All are cited as being of interest and to show the state of the prior art.
